THE FUTURE IN .NET MAUI

David Ortinau
Principal Product Manager, .NET
david.ortinau@microsoft.com
@davidortinau

We are building .NET MAUI to be the most productive way to develop native apps that perform great on any device that runs Android, iOS, macOS, or Windows from a single codebase.

We are building .NET MAUI to be the most productive way to develop native apps that perform great on any device that runs Android, iOS, macOS, or Windows from a single codebase.

.NET Multi-platform App UI (MAUI)

Generally available

Unified .NET

Mobile, desktop, hybrid

Native APIs, Native performance

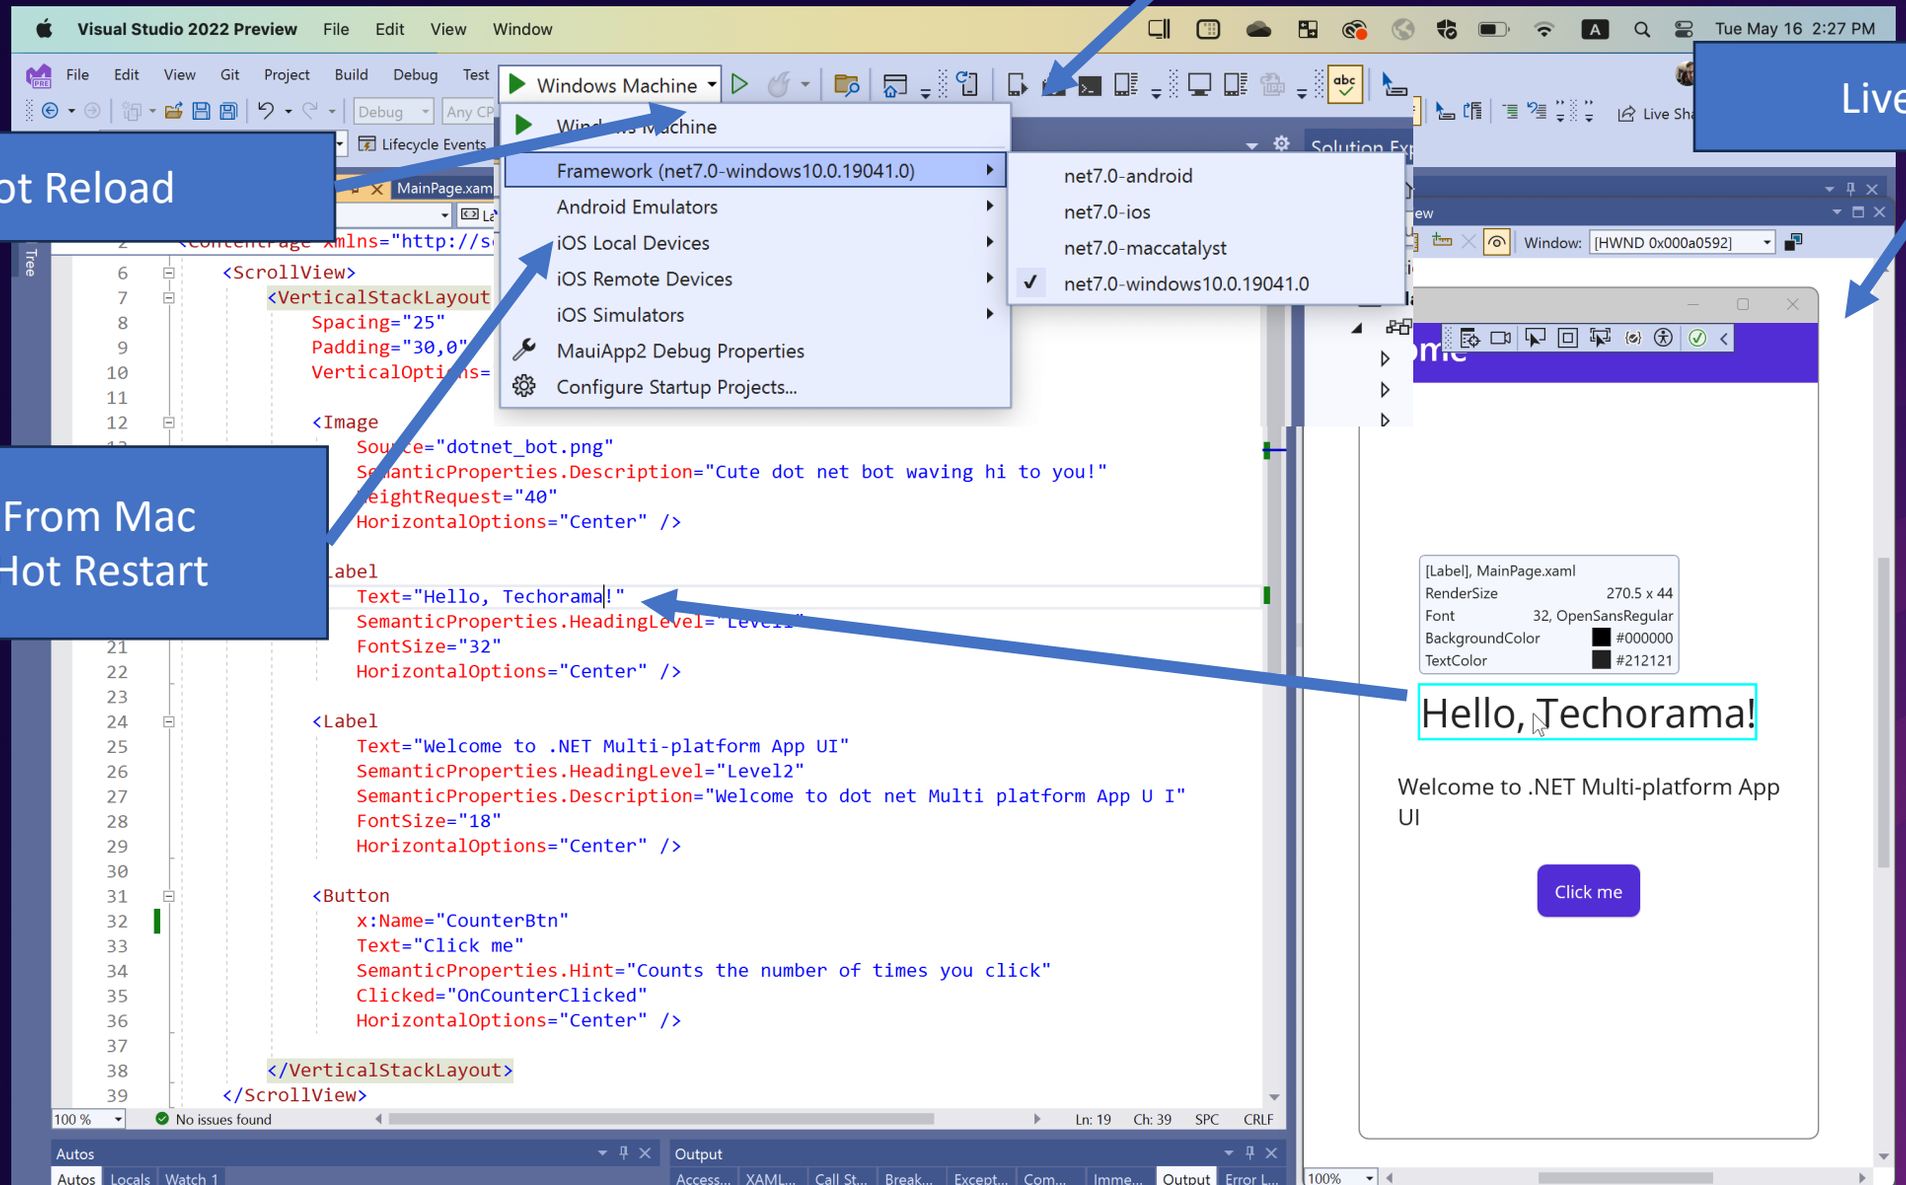

40+ UI controls

Common platform services

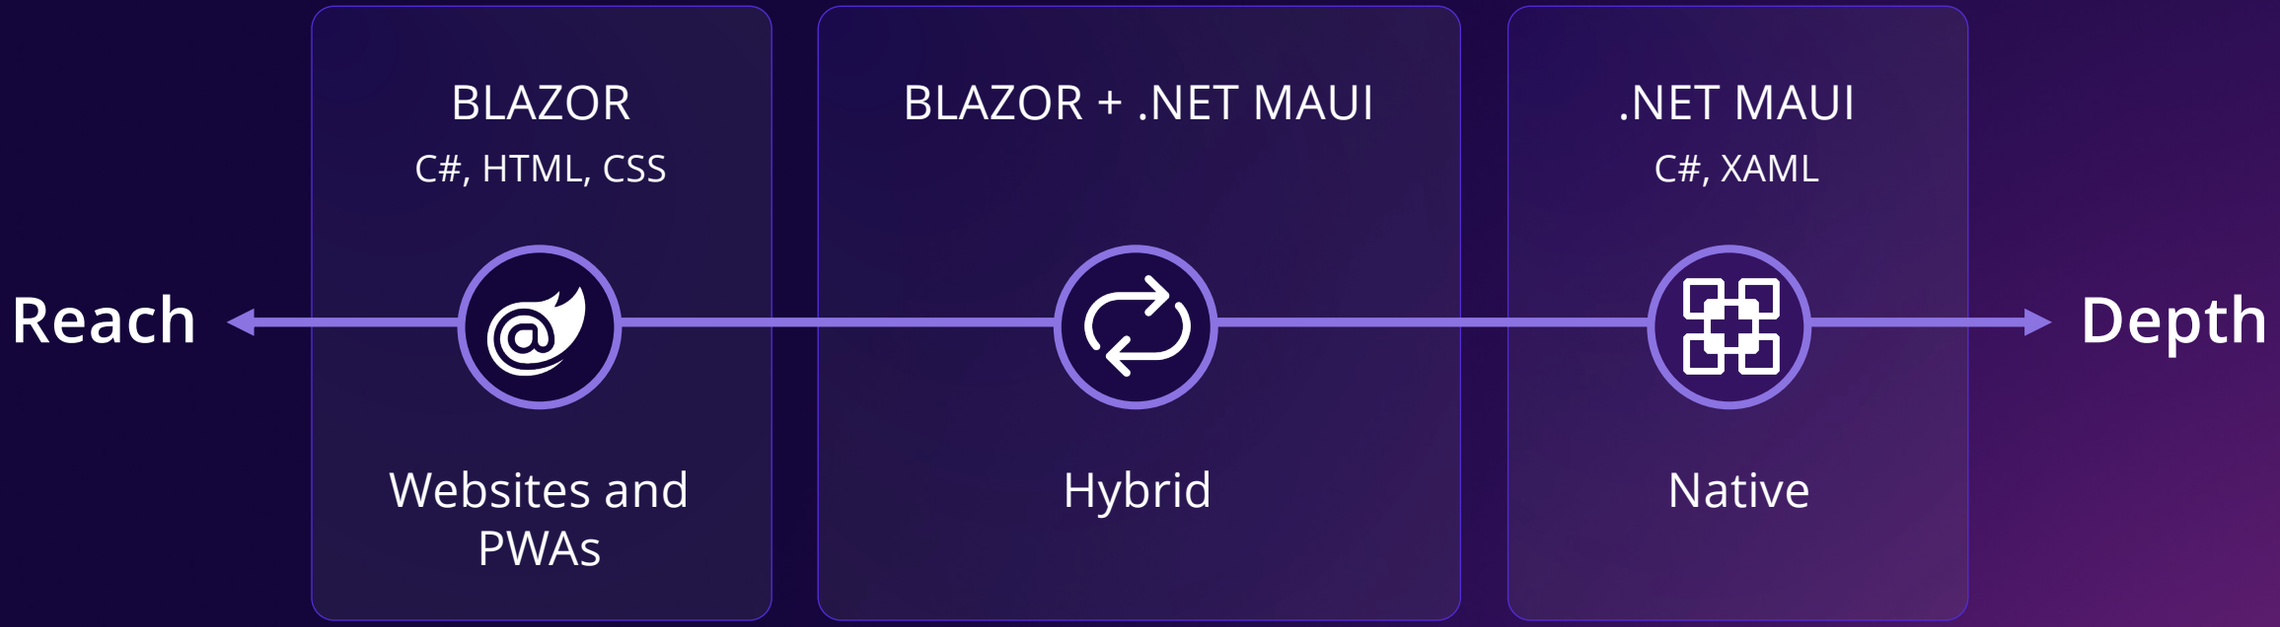

Accessible by default

dot.net/maui

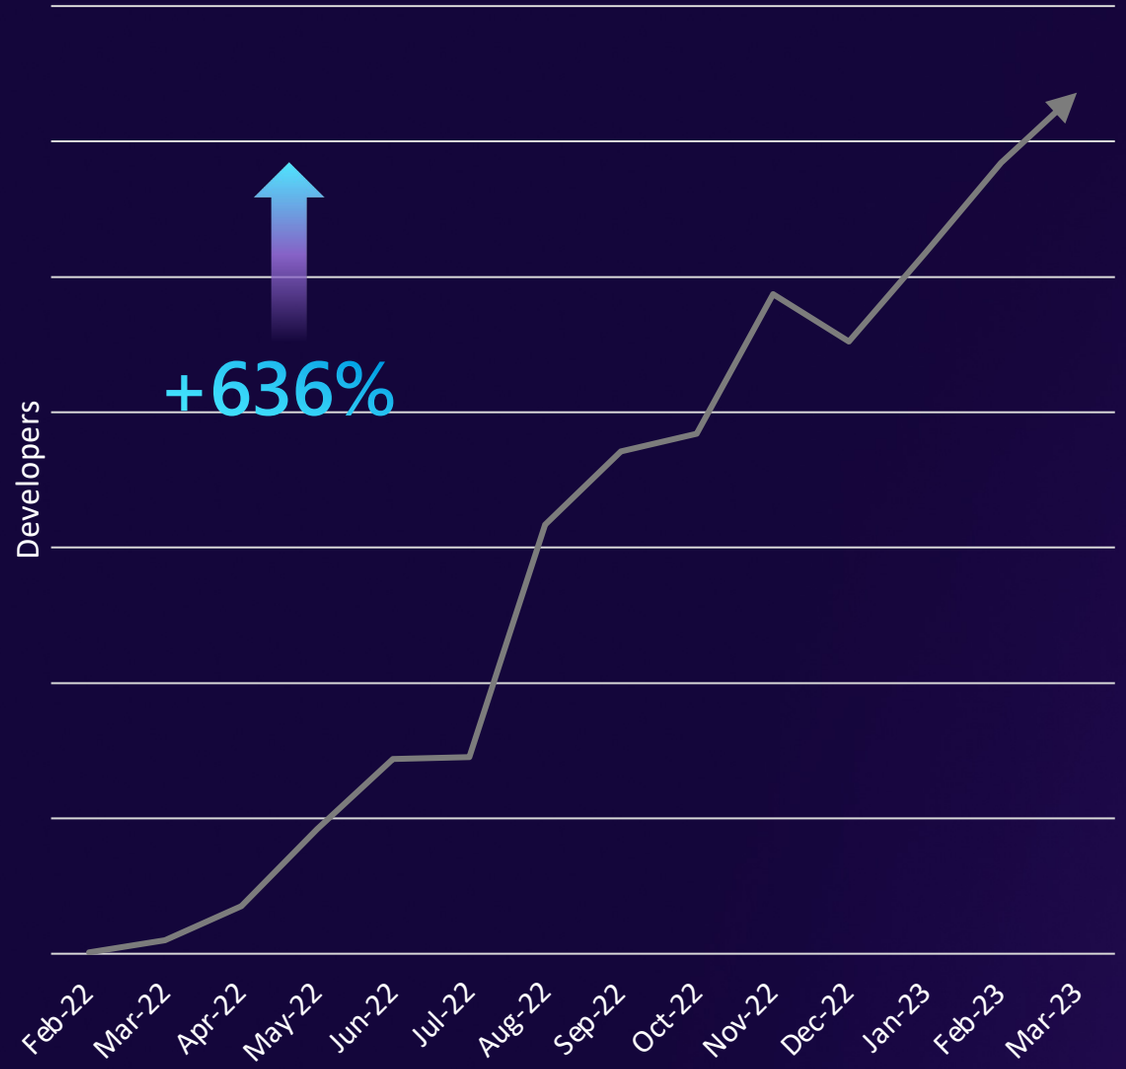

Productivity

.NET offers choice for developers

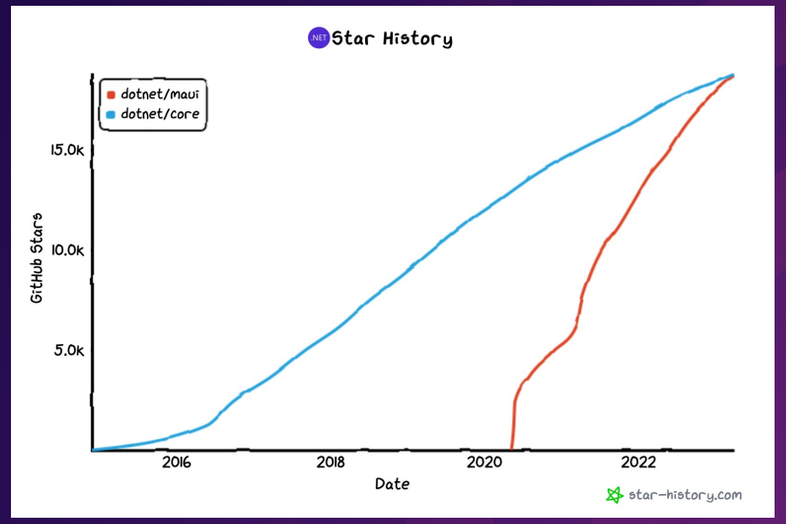

.NET MAUI is Growing!

Most active .NET Foundation project

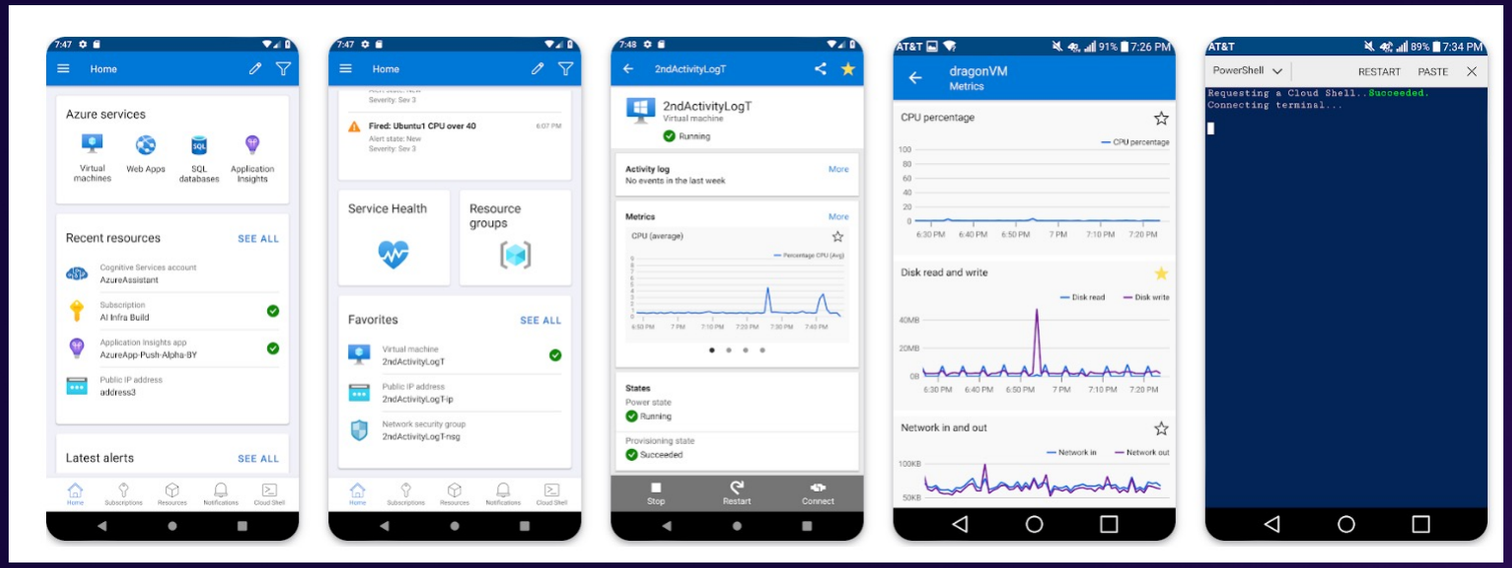

Project	Pull Requests
.NET MAUI	1779
Azure SDK	1460
ASP.NET Core	641
Windows Forms	322
EF Core	212
WPF	199
MSBuild	196
WCF	86

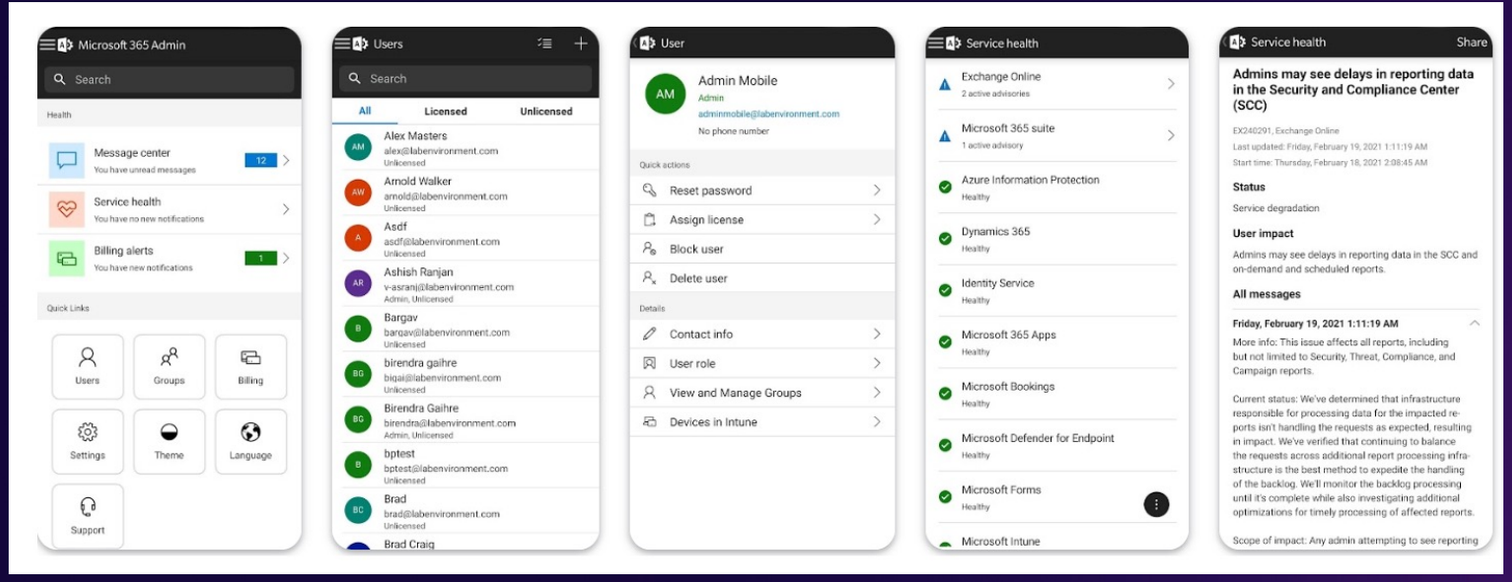

Project	Issues
.NET MAUI	1301
ASP.NET Core	1057
Azure SDK	677
EF Core	468
Windows Forms	181
MSBuild	165
Orleans	86

Customer Successes

Azure Mobile & M365 SharePoint Admin

250+

.NET MAUI apps verified in Google Play Store

20+

Direct engagements on new apps and Xamarin upgrades

4+

First-party apps on track for release later this year

“The new handler architecture really opens up access to the native components with minimal overhead in terms of memory allocations and view hierarchy (compared with custom renderers). In our experience we've found that this even allows us to implement workarounds for issues in .NET MAUI itself whilst we await a fix, which is extremely powerful.”

Rod Ball, Chief Technology Officer, Irth Solutions

Also New in .NET 8

- NuGet packages
- Workload improvements (#30008)
- UI Testing for .NET MAUI apps
- Native AOT
- Native Libraries (#79377)
- Desktop
  - Keyboard listeners and accelerators
  - Deep linking (Blazor hybrid)

.NET MAUI HybridWebView Experiment

- Multi-platform control based on .NET MAUI WebView
- Host static web assets (HTML, JS, CSS, etc.)
- Communicate between JavaScript & .NET
- Reuse your Angular, React, etc. investments in MAUI native desktop and mobile apps
- Use any web-based UI and it can interact with C# code

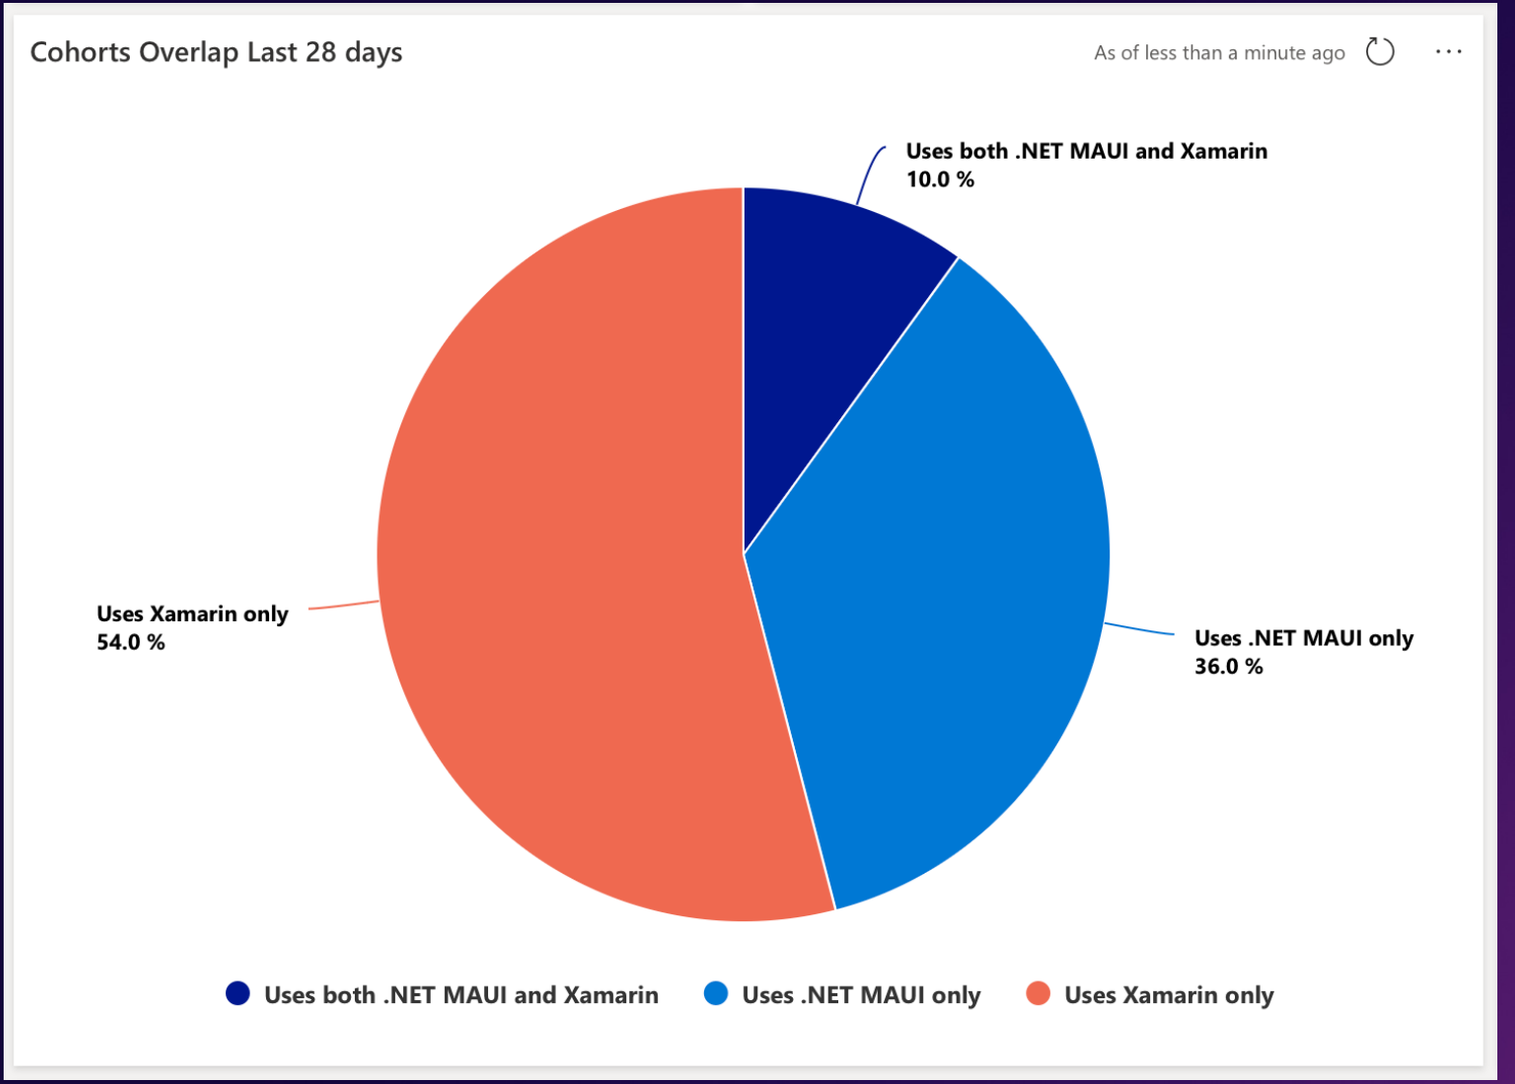

- Looking for feedback!
- github.com/Eilon/HybridWebView

.NET MAUI HybridWebView Experiment

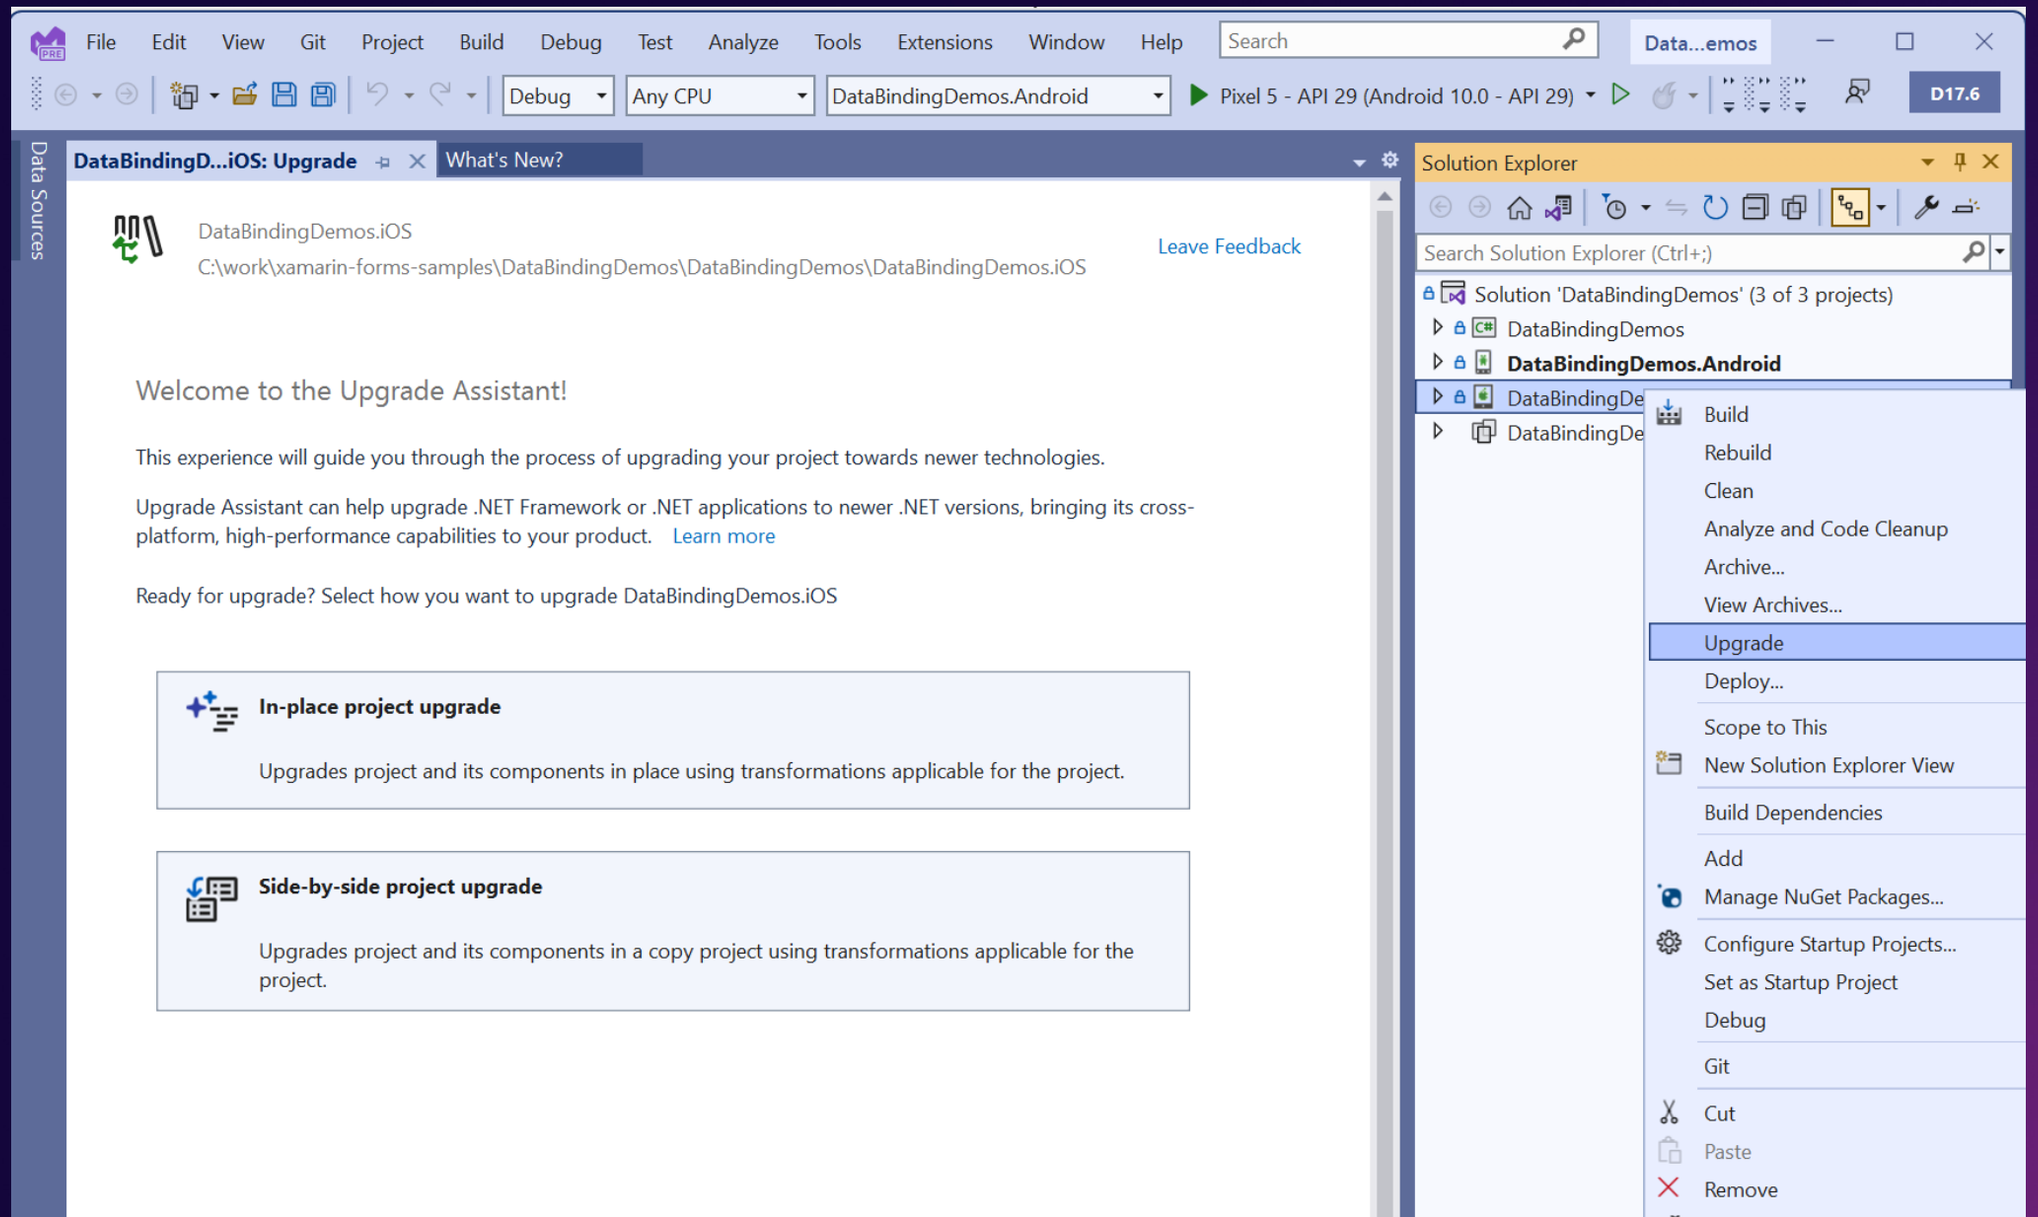

```
<Grid ColumnDefinitions="*" RowDefinitions="Auto,*">
    <Label
            Text="{Binding TodoAppTitle}"
            FontSize="32"
            HorizontalOptions="Center" />

    <hwv:HybridWebView Grid.Row="1" x:Name="myHybridWebView" HybridAssetRoot="ReactTodoApp" MainFile="index.html" />
</Grid>
```

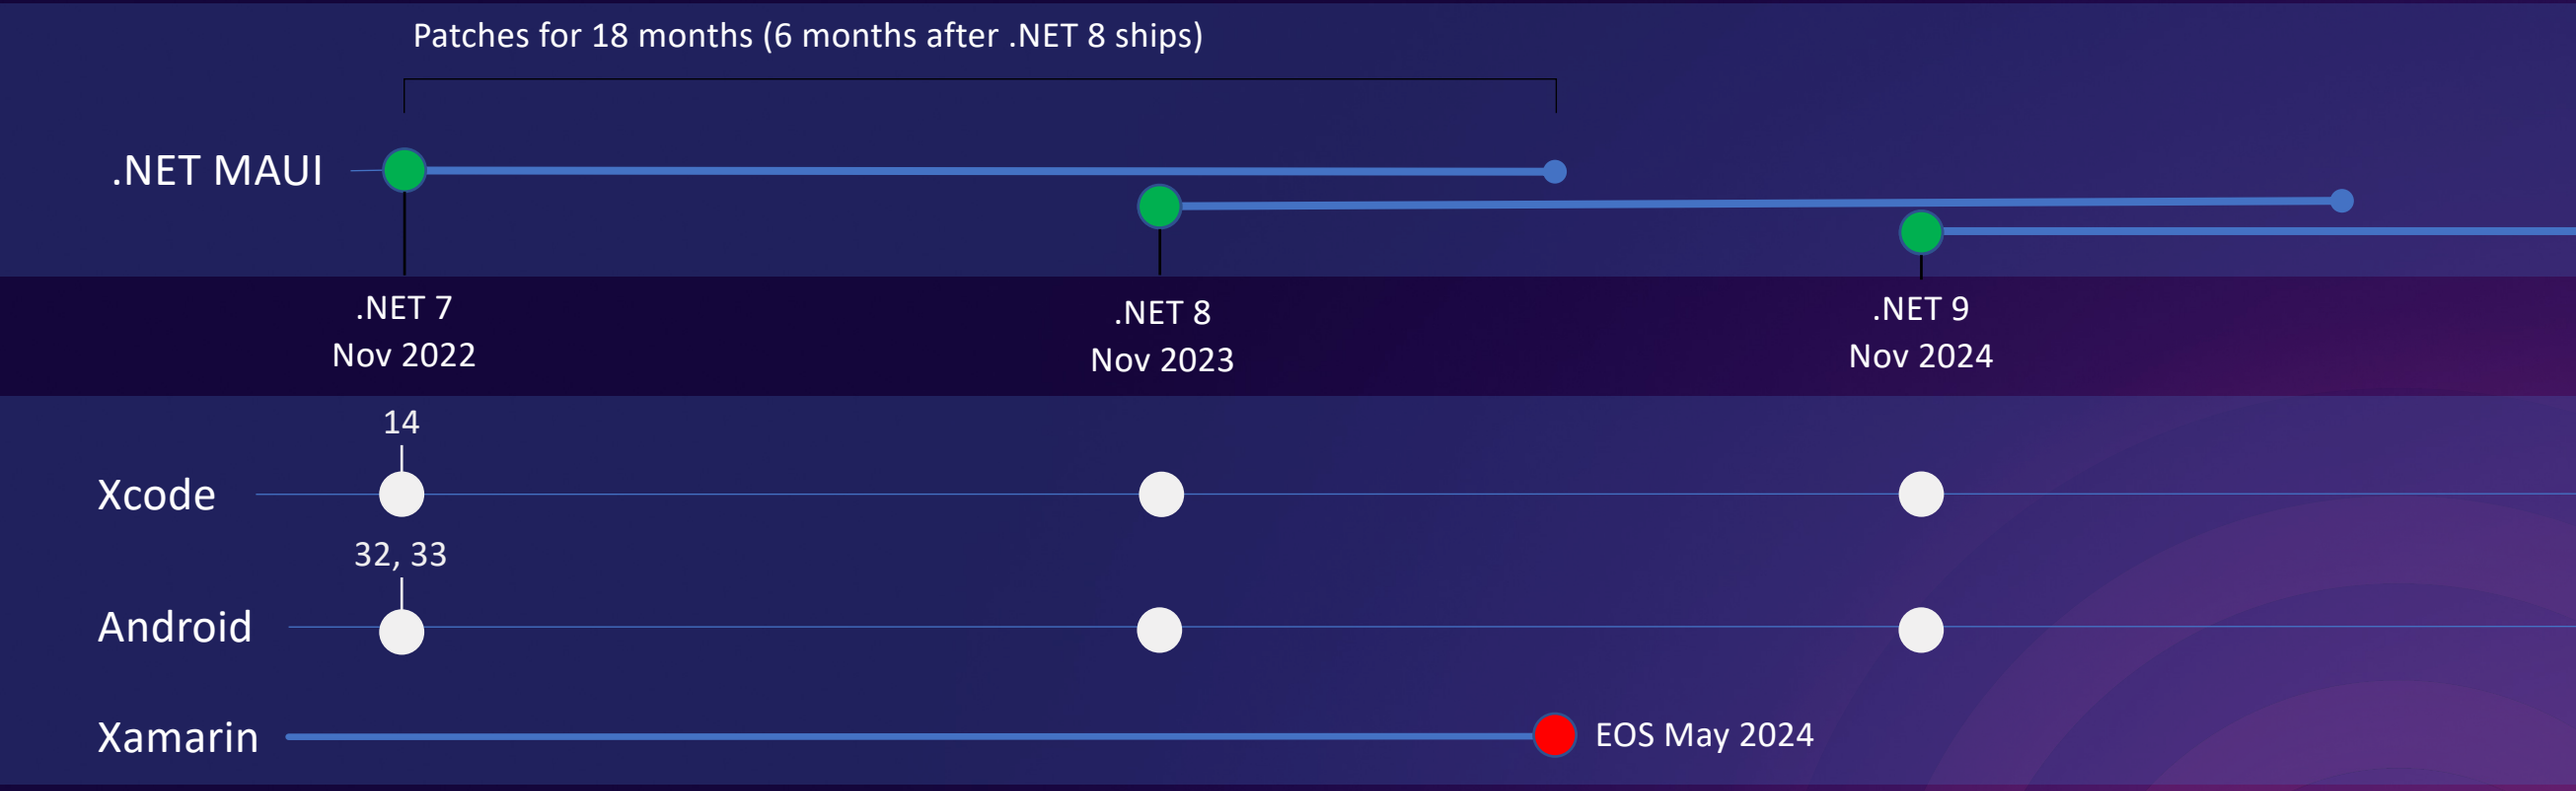

Moving from Xamarin to .NET MAUI

.NET Upgrade Assistant extension with Visual Studio 17.6

Release schedule, support & patching

- A major version of .NET MAUI will ship with .NET going forward (.NET 7, .NET 8, etc.)
- .NET MAUI is an optional workload with external dependencies (such as Xcode & Android SDK tools)
- A major version of .NET MAUI will receive patches for 6 months after a successor (major version) ships
- Xamarin SDKs will receive support until May 2024

Thank You!

Let's build amazing apps with .NET
get.dot.net
