Introducing Visual

Why Consistency Matters

Why?

"Our customers are elderly and when they call in for support, we want to know our instructions are consistent no matter the device."

Why?

"Our customers are elderly and when they call in for support, we want to know our instructions are consistent no matter the device."

"By supporting one UI we can move faster than our competition."

Why?

"Our customers are elderly and when they call in for support, we want to know our instructions are consistent no matter the device."

"By supporting one UI we can move faster than our competition."

"Our company supports many apps, so sharing more code means less burden of support."

Why?

"Our customers are elderly and when they call in for support, we want to know our instructions are consistent no matter the device."

"By supporting one UI we can move faster than our competition."

"Our company supports many apps, so sharing more code means less burden of support."

"To get approved by the regulatory body (FDA)."

Enter Visual

Visual

A simple API to change the renderer used to render a control at runtime to more closely match your design objectives.

Renderers are built to express specific design guidelines:

- Apple Human Interface Guidelines
- Google Android Holo
- Google Material Design
- Microsoft Fluent Design

Material Visual

```
Visual="Material"
```

Demo: File New

Material Visual

```
[assembly: ExportRenderer(typeof(Xamarin.Forms.Button),
               typeof(MaterialButtonRenderer),
               new[] { typeof(VisualMarker.MaterialVisual) })
]

namespace Xamarin.Forms.Material.Android
{
     public class MaterialButtonRenderer : MButton, ...
     {
```

Material Visual

```
[assembly: ExportRenderer(typeof(Xamarin.Forms.Button),
               typeof(MaterialButtonRenderer),
               new[] { typeof(VisualMarker.MaterialVisual) })
]

namespace Xamarin.Forms.Material.Android
{
     public class MaterialButtonRenderer : MButton, ...
     {
```

Material Visual

```
[assembly: ExportRenderer(typeof(Xamarin.Forms.Button),
 typeof(Xamarin.Forms.Material.iOS.MaterialButtonRenderer),
    new[] { typeof(VisualMarker.MaterialVisual) })
]

namespace Xamarin.Forms.Material.iOS
{
    public class MaterialButtonRenderer :
                            ViewRenderer<Button, MButton>, ...
```

Material Visual

```
[assembly: ExportRenderer(typeof(Xamarin.Forms.Button),
 typeof(Xamarin.Forms.Material.iOS.MaterialButtonRenderer),
    new[] { typeof(VisualMarker.MaterialVisual) })
]

namespace Xamarin.Forms.Material.iOS
{
    public class MaterialButtonRenderer :
                            ViewRenderer<Button, MButton>, ...
```

Material Visual

```
namespace Xamarin.Forms
{
    public static class FormsMaterial
    {
        public static void Init(Context context, Bundle bundle)
        {
                    // my only purpose is to exist so when called
                    // this dll doesn't get removed

                    VisualMarker.RegisterMaterial();
        }
    }
}
```

README.md

Visual Challenge

To take a single page design from a previous project that should look the same on iOS and Android, and attempt to recreate it using the latest Visual feature of Xamarin.Forms.

Challenge Quick Start

This is testing **Visual**, not your prowess as a mobile developer. I want to learn how successful you are when using this new feature. Or not.

1. Fork this repository
2. Choose a single page design from a previous or current project to recreate from scratch. The more real world the better. Plus, you can reuse assets.
3. Open `VisualChallengePage.xaml`. Take an hour (or more if you really want to) and build that screen. Making it super functional doesn't matter, just how it looks and feels.
4. Submit a pull request of your progress back to this repository. Include:
   - a screenshot of iOS and Android
   - your feedback on what went well, and what didn't
   - what you would like to see us doing differently in support of this goal: same design on iOS and Android

What is Visual?

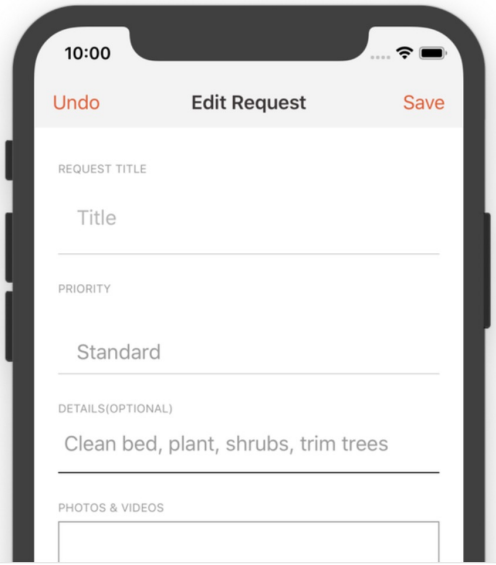

David Ortinau
@davidortinau

who's up for a little #XamarinForms challenge?

Fork, build out a page, & PR your results. Instructions: github.com/davidortinau/V …

Participation will be rewarded with fame & fortune, your name in lights... or at least a blog post.

Here's my first run: github.com/davidortinau/V …
