CollectionView: Xamarin.Forms 4.3

EmptyView

New Layouts

- LinearItemsLayout: Horizontal, Vertical
- GridItemsLayout
- CustomLayout

Incremental Loading

- RemainingItemsThreshold
- RemainingItemsThresholdReachedCommand
- RemainingItemsThresholdReachedCommandParameter

CollectionView: Xamarin.Forms 4.3

Grouping

- Header
- Footer

Item Snapping

Item Spacing

ListView Tip: No ViewCells in favor of performance

Selection

Modes

- None
- Single
- Multiple

Selection is for identifying items on which you will do work separately.

You "can" use selection as a way to trigger a navigation or other event.

Otherwise, use gestures.

Pull To Refresh

RefreshView – a container to add around any scrollable content

```
<RefreshView IsRefreshing="{Binding IsRefreshing}"
             Command="{Binding RefreshCommand}">
    <ScrollView>
        <FlexLayout Direction="Row"
                    Wrap="Wrap"
                    AlignItems="Center"
                    AlignContent="Center"
                    BindableLayout.ItemsSource="{Binding Items}"
                    BindableLayout.ItemTemplate="{StaticResource ColorItemTemplate}" />
    </ScrollView>
</RefreshView>
```

Thanks!
