Build Cross-platform Apps with .NET MAUI

David Ortinau

Principal Product Manager, .NET MAUI

david.ortinau@microsoft.com

Let’s talk about

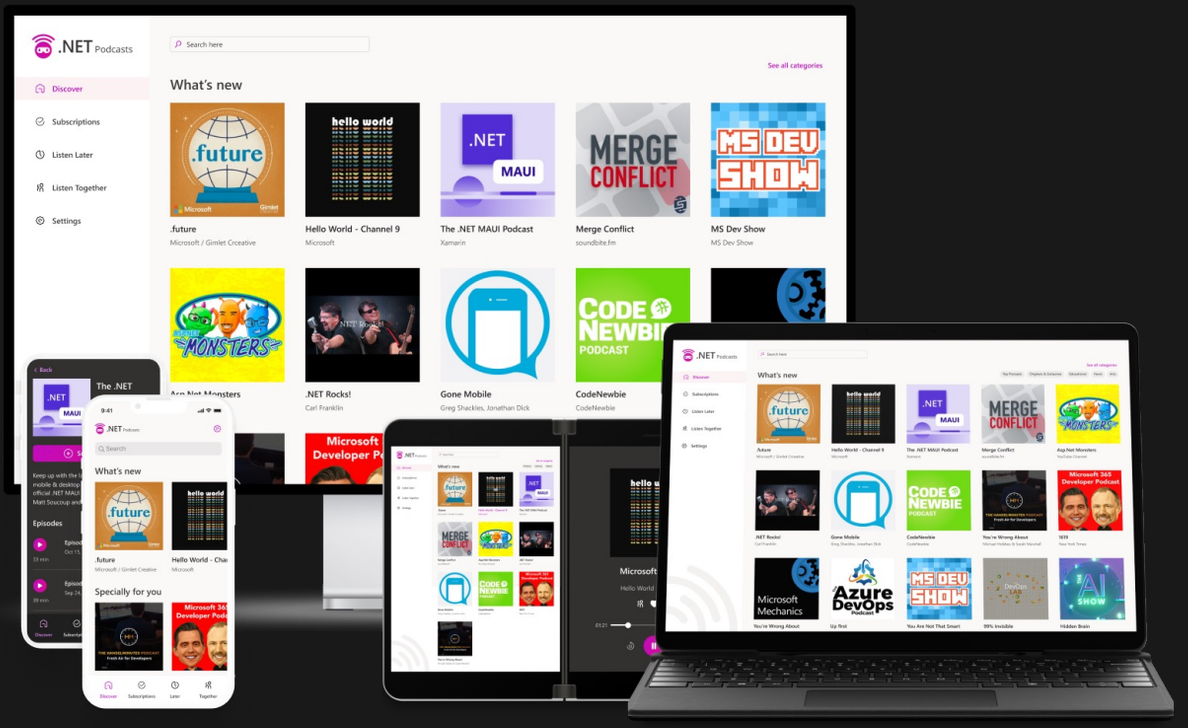

- 5W’s of .NET MAUI
- Making great UI quickly
- XAML & markup extensions
- Fluent C# for the XAML-allergic
- OS integrations

What

We are building .NET MAUI to be the most productive way to develop native apps that perform great on any device that runs Android, iOS, macOS, or Windows from a single codebase.

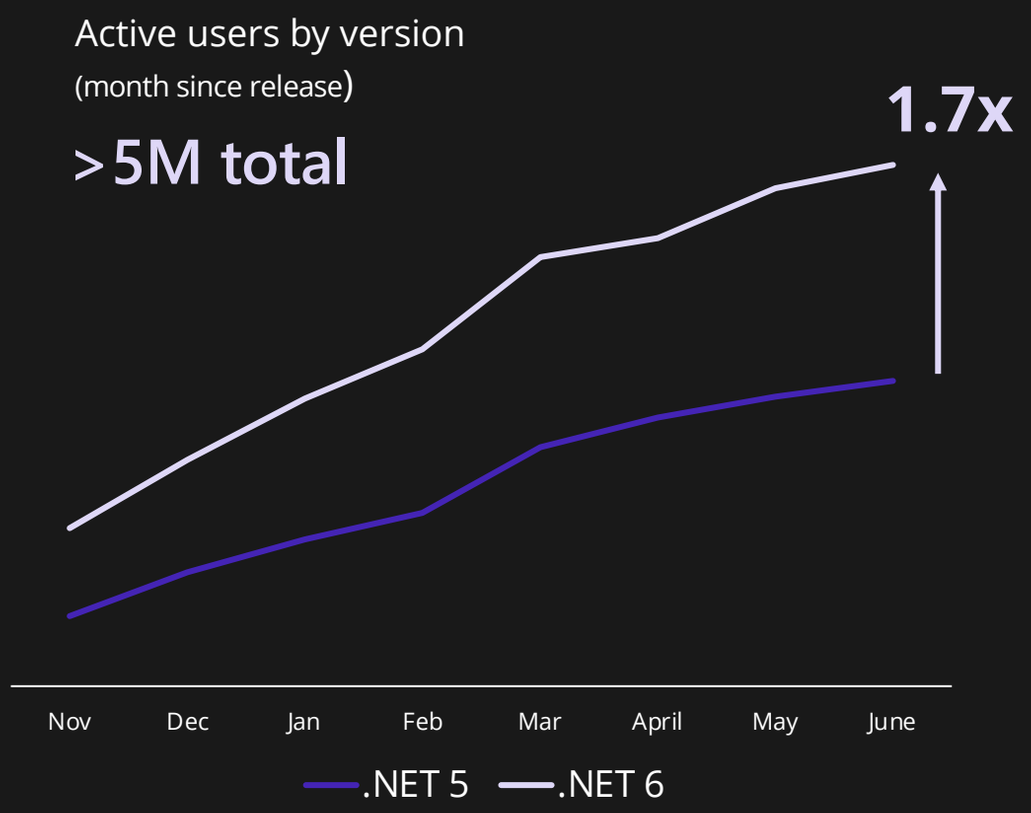

We are building .NET MAUI to be the most productive way to develop native apps that perform great on any device that runs Android, iOS, macOS, or Windows from a single codebase.

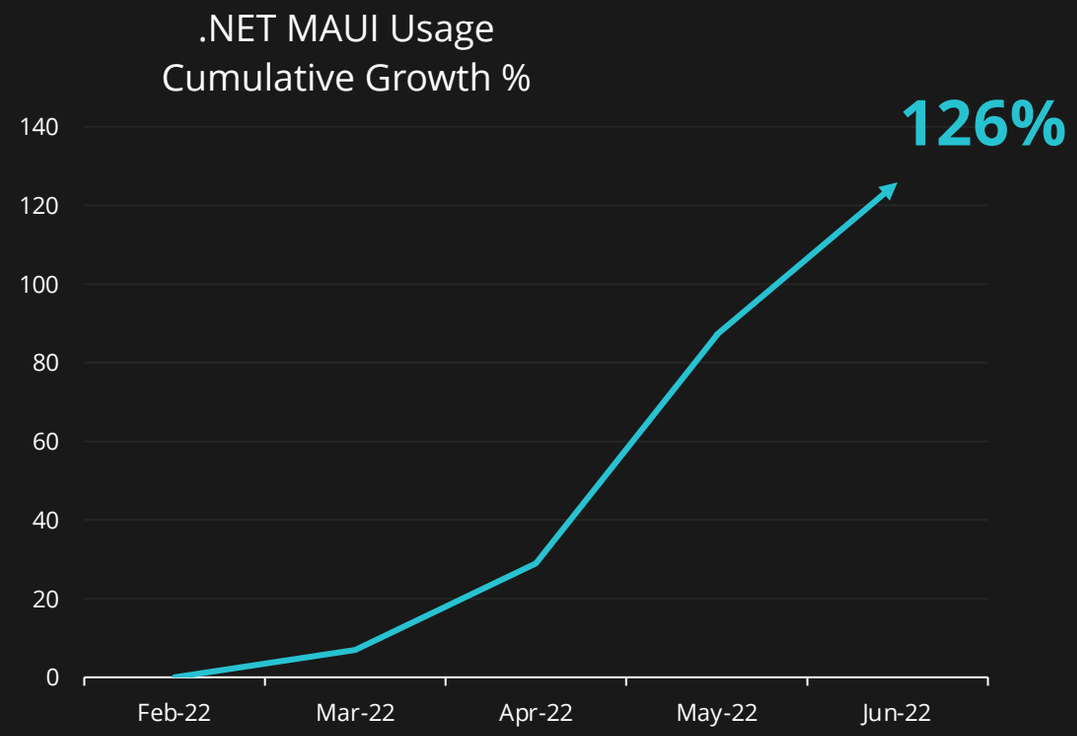

.NET Multi-platform App UI is the most productive way to develop native apps with a single codebase that perform great on any consumer device.

Why

.NET Adoption

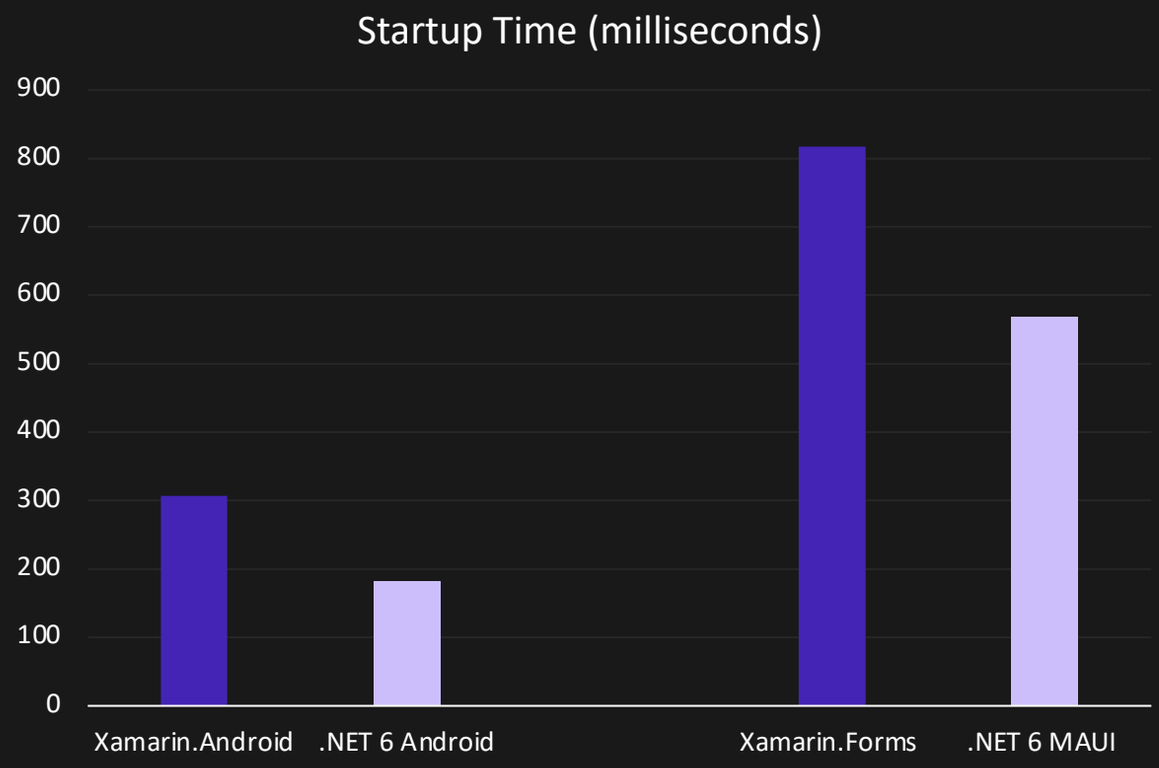

.NET MAUI perf improvements

68%

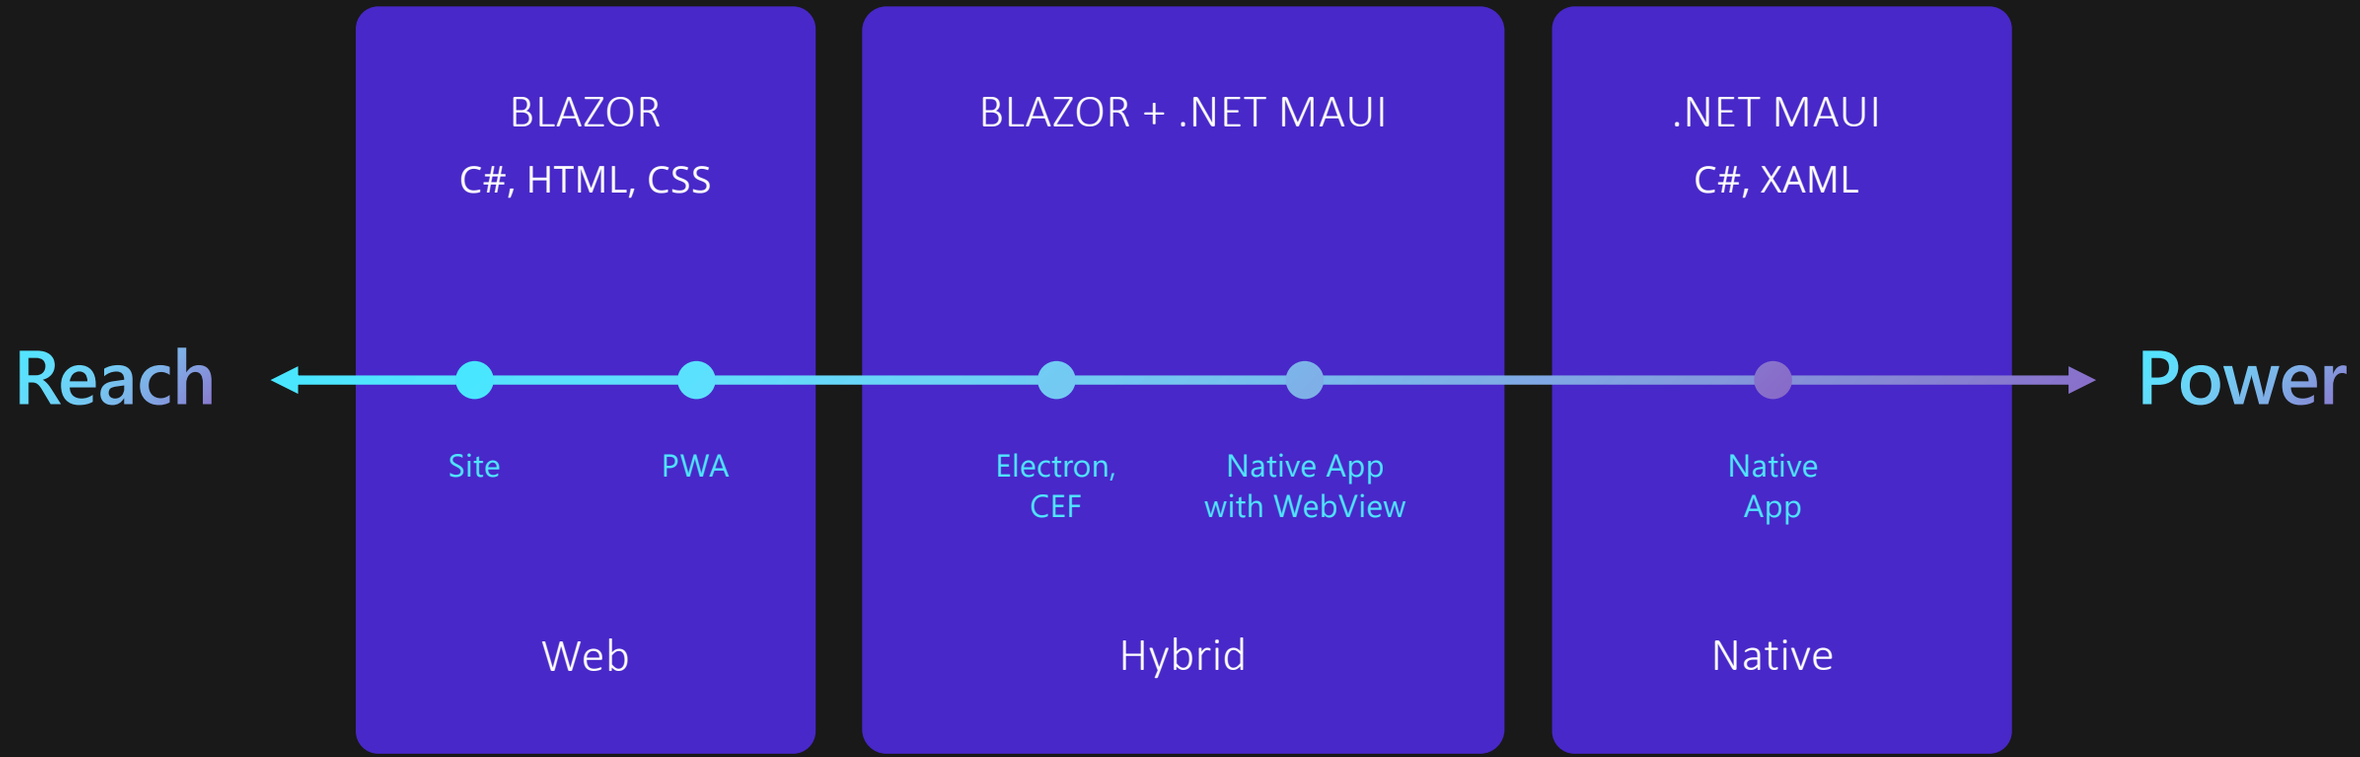

Faster than Xamarin.Android

44%

Faster than Xamarin.Forms

Pronto Pay

“We chose to go into production with .NET MAUI because as a startup, we need to move fast and want be on the cutting edge of tech.

We love the simplicity of a single code-base and the usability on iOS, Android, macOS, and Windows.

And with the ease of deployment built into Visual Studio, we had a tool that allowed us to build a product that was dependable for our customers, yet nimble enough to continue growth with a startup team.”

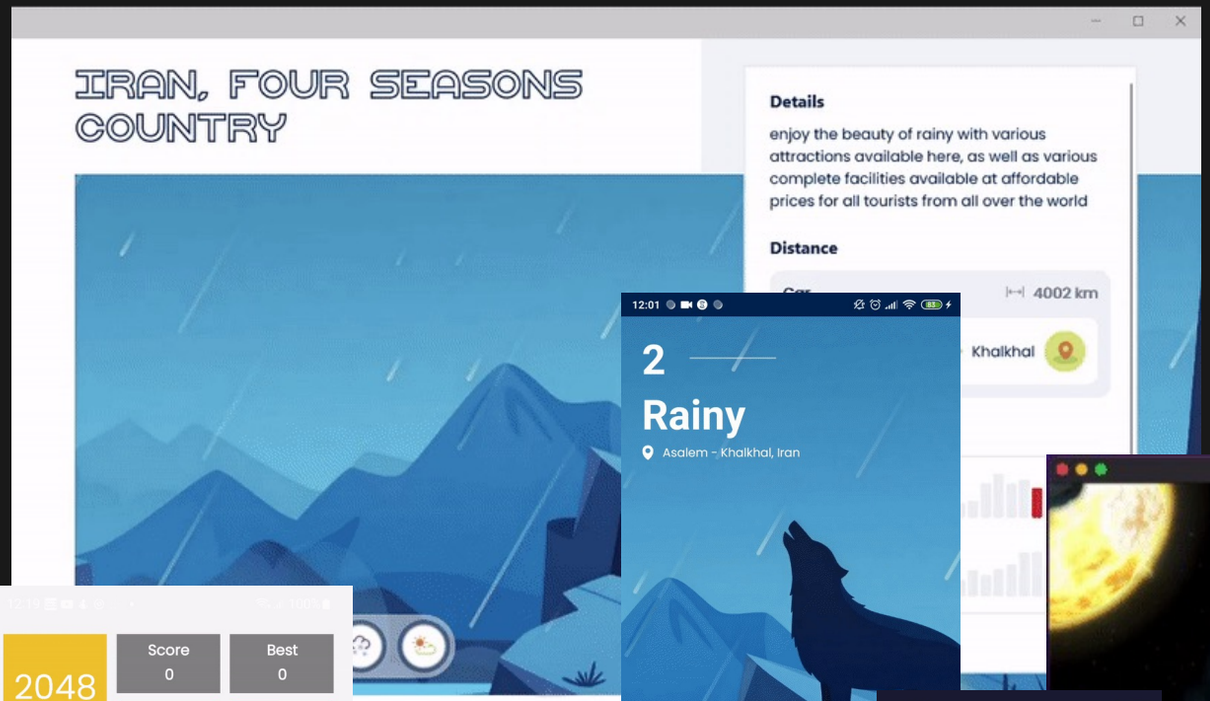

- Jeff Price, Founder & CEO

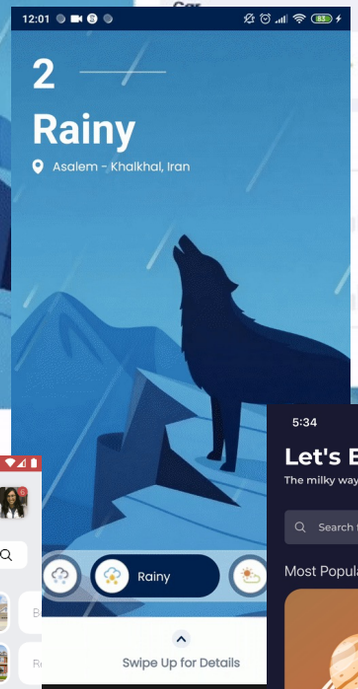

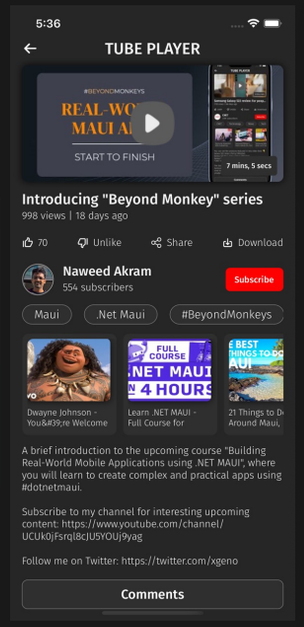

Technologies used

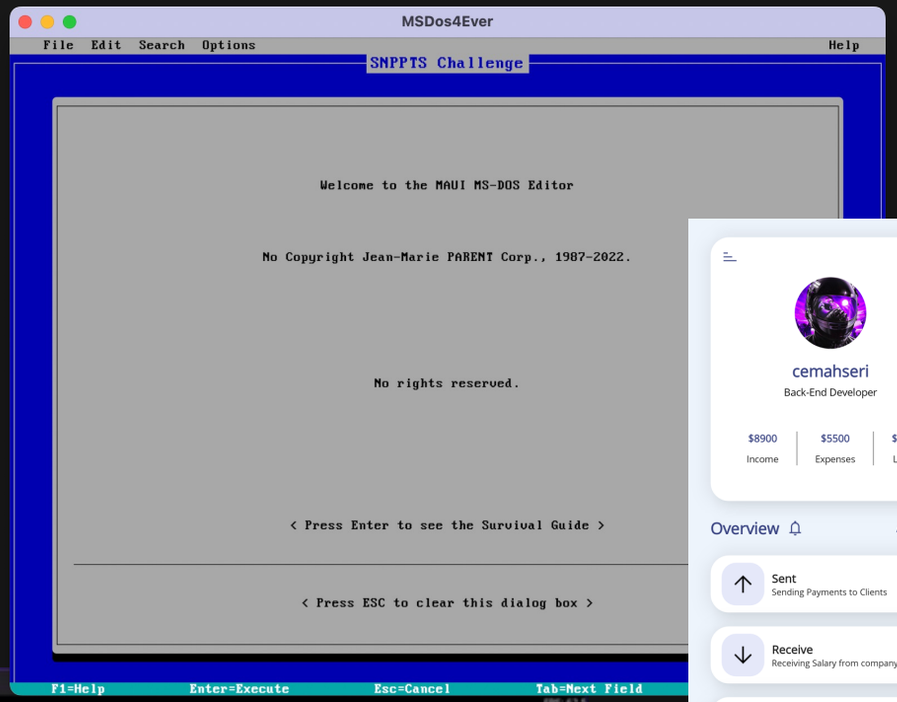

Azure, .NET MAUI, Blazor, GitHub, Visual Studio

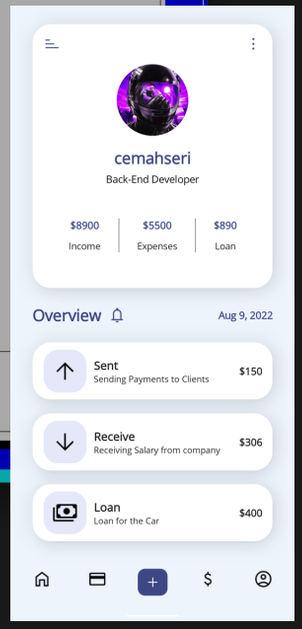

Beautiful UI Challenge

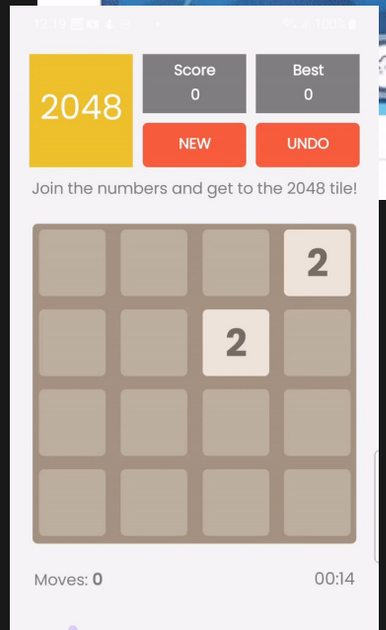

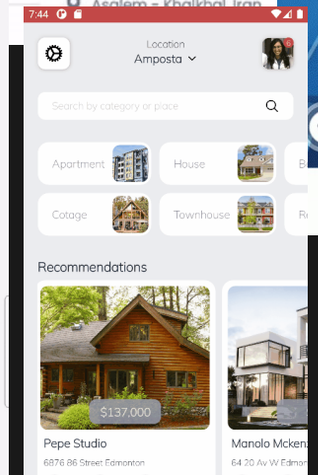

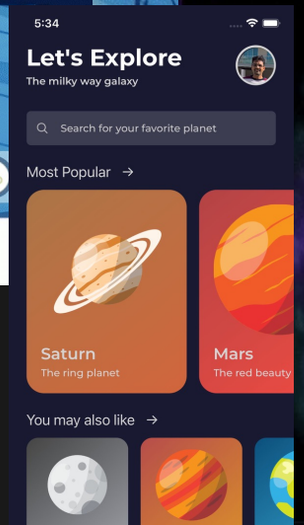

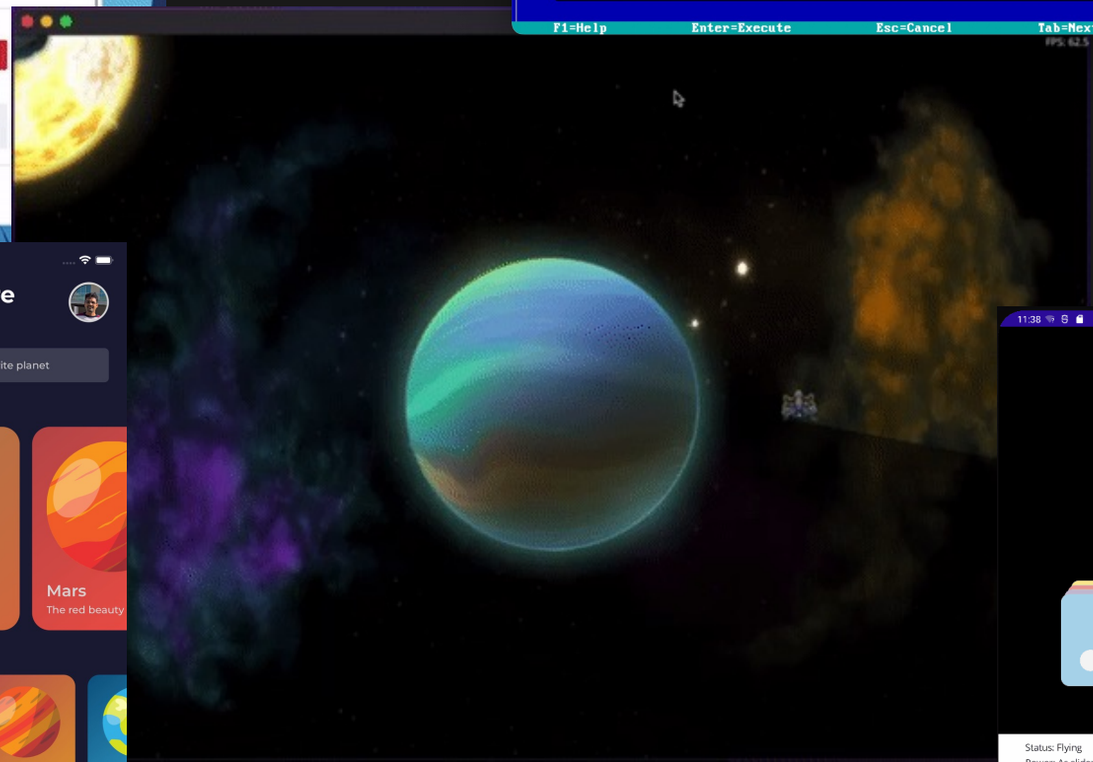

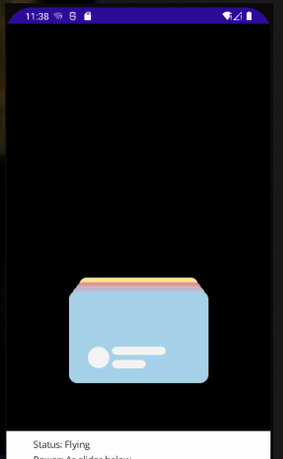

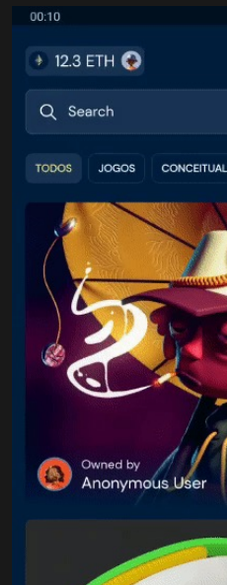

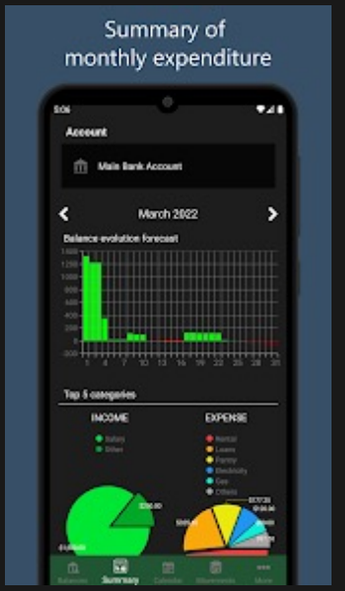

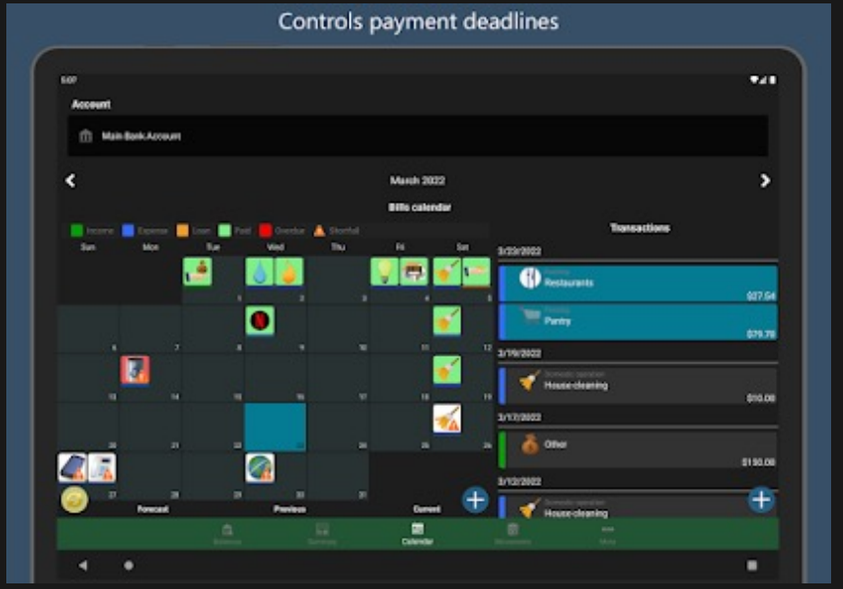

DrosSoft

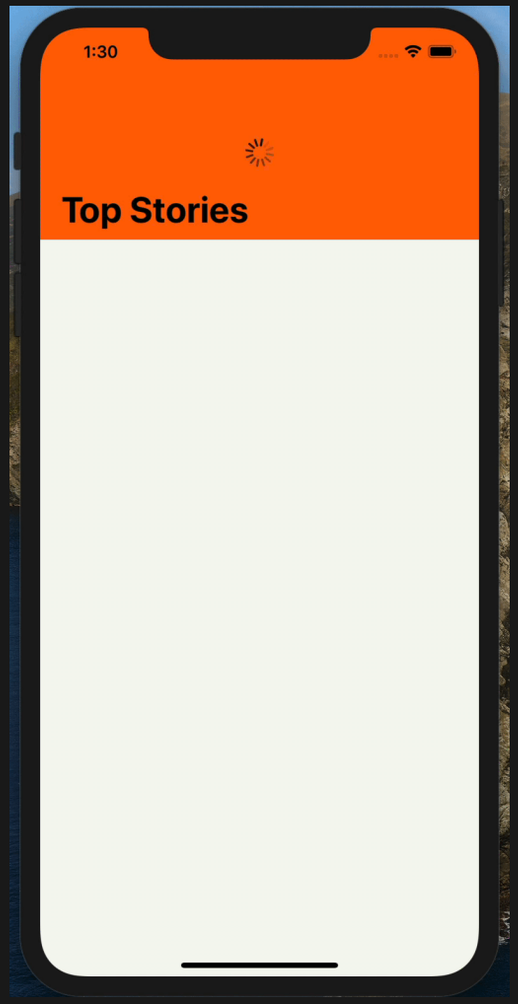

“Amazing! We have already started updating our applications, and many things are easier than before. I missed being able to place tabs at the bottom for Windows, but the sidebar solution seems perfect to me! Great Job!”

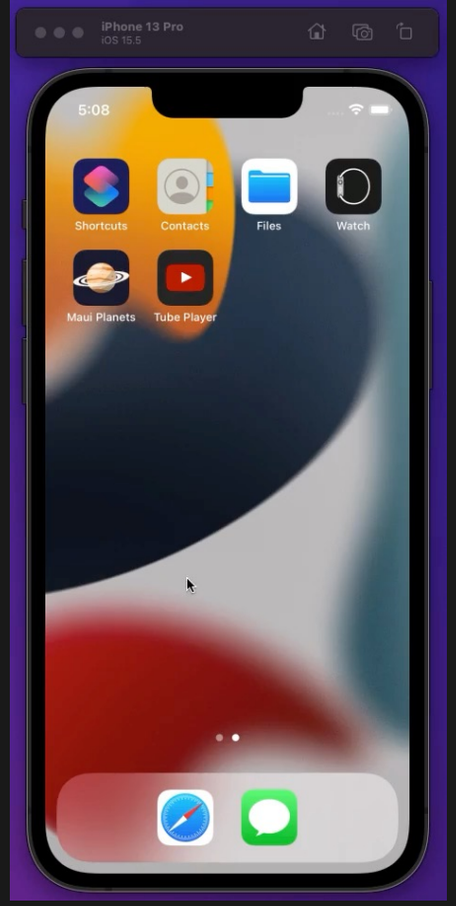

- Diego

Release schedule, support & patching

- A major version of .NET MAUI will ship with .NET going forward (.NET 7, .NET 8, etc.)
- .NET MAUI is an optional workload with external dependencies (such as Xcode & Android SDK tools)
- A major version of .NET MAUI will receive patches for 6 months after a successor (major version) ships
- Xamarin SDKs will receive support until May 2024

.NET 8 planning

Xamarin devs can upgrade to .NET
